

919600: BEAT IT

BEAT IT shoe bags with active coal to keep your shoes fresh and odor-free. Long working days mean sweaty feet – and sweaty feet make your shoes smell. BEAT IT shoe bags with active coal removes moisture and odor in natural, sustainable way.

Active coal used in the shoe bags is produced from bamboo – specifically waste material from bamboo production such as tops and bottoms of the bamboo stalks. The bamboo is burned at low temperatures initially before the temperature is raised to app. 800 - 1000 °C. Fast cooldown results in myriads of tiny pores in the resulting coal.

Range:	Bambus
